ABSTRACT'

This document lists 119 commercially available sets of audiotapes which deal with topecs in mathematics. Scme of the tapes listed were designed to accompany file strips; others are " associated with workbooks, study guides, or other instructional materials. Each listing provides the name of the tape, a level code, a brief description, and the name of the publisher. Six level codes are used to indicate primary, intermediate, junior high school, senior high school, adult, or college. A list of publishers' addresses'is provided. (SD)

Documents acquired by ERIC, include many informal unpublished * materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal * reproducibility are often encountered and this affects the quality * of the microfiche and hardcopy reproductions ERIC makes available * via the ERIC Document Reproduction Service (EDRS). EDRS is not responsible for the quality of the original document. Reproductions * supplied by EDRS are the best that can be made from the original. ********************

Examples of Audio-Tutorial Programs in Mathematics

bу

F. Morgan Simpson

Auburn University at Montgomery Montgomery, Alabama

April, 1976

Introduction

Tutoring is one of the oldest teaching strategies. It has been hypothesized to be superior to other methodologies, but only recently with the use of instructional technology has tutoring become a real possibility for most of today's teachers.

Some of the various strategies which teachers can use to provide private instruction are as listed.

Tutoring Strategies

- 1. Audio-Tutorial Instruction
- 2. Computer Assisted Instruction
- 3. Individualized Instructional Packages
- Personalized System of/Instruction
- 5. Programmed Instruction
- 6. Tutorial
- 7. Video Tutorial Instruction

This paper sites examples of only audip-tutorial programs. 🐍

Audio-tutorial Instruction is a program of learning which utilizes audio tapes and other learning materials such as textbooks, filmstrips, workbooks and other materials. Basically the instruction is a programmed sequence of learning activities which are presented to the student by the use of audio-tapes.

The development of the audio-tutorial method is attributed to the work of Samuel N. Postlethwait of Purdue University. In 1961 Postlethwait first sought to put only casual comments on audio tapes to assist students in his freshman botany/course.

From this beginning, audio tutorial instruction has grown in popularity. Its' use in the classroom can be seen in all levels of education from the elementary school through higher education.

With audio-tutorial materials the student is able to stop the recorder and re-play the instructional explanations. Essentially, the voice on the audio tape acts as a tutor for the student. With the use of a visual display, the student becomes an actively involved learner.

This paper was prepared to assist mathematics teachers in their identification of various commercially prepared audio-tutorial programs in mathematics. The writer solicited information about programs from various vendors. The specific materials are presented alphabetically by title with information such as author, level, description and company presented when available. Lastly, the specific programs are grouped according to the vendor.

EXAMPLES OF AUDIO-TUTORIAL PROGRAMS IN MATHEMATICS

Compiled by F. Morgan Simpson Auburn University at Montgomery April, 1976

Title and Author (if available)	Level	Description	Company
1. Addition and Substraction Learning Module	p.	The module consist of 12- sound filmstrips, 24 cas- sette/response card lessons and manipulatives	Society for Visual Educa- tion
2. Algebra Modules: Intermediate Level by Joseph Newmyer, Jr. & Gus Klentos		Coordinated audio-tapes and student workbook	Charles E. Merrill
3. Algebra: Semesters 1 and 2	S.A.	Six filmstrips and cas- settes for use in the AutoTutor which results in a branched program.	TutorSystems
4. Algebra: Semesters 3 and 4	s.A	Six Ailmstrips and cas- settes for use in the AutoTutor which results in a branched program.	Tutor\$ystems
5. Applied Mathematics for Technical Programs by Robert G. Moon	C,	Coordinated audio-tapes and student workbook	Charles E. Mertill
6. Arithmetic: A Modern Approach, Second Edition		A set of cassettes to accompany the Keedy and Bittinger textbook. There is one lesson for each section in the text.	Addison- Wesley
7. Arithmetic Exercises	s ·	Four sets of 24 lessons on 6 cassettes with student worksheets.	Baker and Taylor

_				
8.	Arithmetic Fundamentals-CTB	P,I J,H A		TutorSystems
·9.	Arithmetricks by Joseph Philip Cech	P.	Twelve cassettes with student response books	Coronet Films
10.	Basic Addition Facts Filmstrips	· •	Seven filmstrips, and cas- settes along with 5 repro- ducible response booklets, plastic page protectors and wipe-off crayons.	Educational Activities
11.	Basic Algebra		A program of 52 filmstrips/ cassettes.	Gamco Indus- tries, Inc.
12.	Basic Applied Mathematics	н,с А	A coordinated audio-tapes and student workbook	Edu cu l ture
13.	Basic Arithmetic by Robert G Moon, Arthur H. Konrad, Gus Klentos and Joseph Newmyer, Jr.	C	A completely coordinated audio-tape and student workbook	Charles E Merrill
14.	Basic Mathematics by Joanna S. Burris	С	A coordinated audio-tapes, and student workbook con- sisting of 35 cassette tapes.	Prindle, Weber and Schmidt
15.	Basic Mathematics Modules by Robert G. Moon, Arthur H. Konrad, Gus Klentos and Joseph Newmyer	J,S .	Consist of 20 cassettes coordinated with study books	Merrill
16.	III by Allan A. Schwartz	P,I	1	Educational Activities
	• •	1	•	•

					_
•		Basic Multiplication Facts Filmstrips		Eight filmstrips and cas- settes along with 5 repro- ducible response booklets, plastic page protectors and wipe-off crayons.	Educational Activities
	18.	Beginning Algebra by Robert Evans and William Hemmer		Four units with film- strips and audio cas- settes	Harper and Row
,	19.	Beginning Metric Measure- ment Learning Module	P	The module consist of 6 filmstrips with cassettes plus several manipulatives	Society for Visual Educa- tion
•	20.	Career Arithmetic	J,S C,A	Eight filmstrips and cas- settes for use in the AutoTutor which results in a branched program.	TutorSystems
	21.	Colonial Films - filmstrips by Bernard H. Gundlach		Eight filmstrips with accompanying cassette tapes reviewed in April, 1974 issue of Mathematics Teacher	Colonial Films
	ž2.	Common Fractions (Rational Numbers)	•	Sixteen Cassettes and ac- companing worksheets	Tutortapes
	23.	Comparing Things: What's the Difference in Difference? by James L. Hymes	,P	Six filmstrips, and cas- settes	Coronet Films
•	24.	Computapes: Modules 7-11 Director Stanley J. Bezuszka	I,J	Audio cassette tapes and accompanying ditto masters Reviewed in April, 1975 issue of Mathematics Teacher	Science Researc Associates
	25.	Computer Mathematics: Computer Number Bases by William R. Panks	, , n	A coordinated audio-tape and student workbook program Review in January, 1975 issue of Mathematics Teacher.	Williams ville Publishing Co., Inc.
			,		

				
· 26.	Concepts of Math		A program of 40 filmstrips/cassettes with concepts of general mathematics.	Gamco Indus- tries
27.	Contemporary Nathématics .	I.J.	Six filmstrips and cas- settes for use in the AutoTutor which results in a branched program.	TutorSystems
28.	Decimal Horkshop	J	Eight cassettes with student response books	Coronet Films
29.	Division Learning Module	· I	The module consist of 6 sound filmstrips, 12 cassette/response card lessons plus games.	Society for Visual Educa- tion
30.	Doing Geometry	Ī	Ten cassettes with stu- dent work books	Coronet Films
31.	Early Math, Set 1	, b	Five cassettes with du- plicator workbook	Mafex Media 'Aids
32.	Early Math, Set 2	P	Five cassettes with du- plicator workbook	Mafex Media Aids
33.	Elementary Algebra, 2nd Ed. by Robert G. Moon and Robert Davis	c }	Coordinated audio-tape and student workbook	Charles E. Merrill
	Elementary Functions: Algebra and Analytic Geometry by Gus Klentos and Joseph Newmyer	С	Coordinated audio-tapes and student workbook	Charles E. Merrill
35.	Elementary Functions: Trigo- nometry by Gus Klentos and Joseph Newmyer	С	Coordinated audio-tapes and student workbook	Charles E. Merrill
36.	Elementary Number Concepts and Skills	p	Two filmstrips and cas- settes for use in the AutoTutor which results in a branched program.	TutorSystems
